

TESTING HARD-TO-ACCESS SMOKE DETECTORS?

Scorpion is the solution for testing hard-to-access detectors. Suitable for both Point and Aspirating Smoke Detection (ASD) systems, Scorpion ensures all smoke detectors can be tested – regardless of location.

www.detectortesters.com/scorpion

Scorpion makes testing smoke detectors in lift shafts, warehouses, ceiling voids and secure areas as simple as testing detectors within easy reach.

COMPLIANT

Ensures all detectors can be tested as required by standards

SIMPLE

Easily test detectors in sensitive or inaccessible areas

COST EFFECTIVE

No need for additional access equipment or third party personnel

SCORPION 1000 SERIES

- Designed to test point smoke detectors
- Scorpion permanently wired next to detector
- Test run from convenient, safe location

SCORPION 2000 SERIES

- Designed to test aspirating smoke detection systems
- Scorpion permanently wired next to sampling hole
- Transport time measured from convenient, safe location
