DT CONNECT

Still recording your test results with a clipboard and pen?

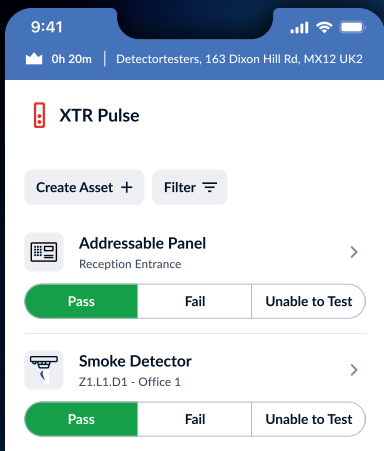

XTR Pulse is a new simple accessory which enables automated test reports from any test device.

Use XTR Pulse with your existing test tools to digitise Pass/Fail results straight into DT Connect — no paperwork, instant evidence.

Smarter testing starts with XTR Pulse and DT Connect

- ✓ **Real-Time Results** – Capture and record tests as you go with XTR Pulse alongside any tester.
- ✓ **Comprehensive Asset Management** – Track detectors, call points, emergency lighting and more.
- ✓ **Panel Reconciliation** – Ensure every test is acknowledged by the fire panel.
- ✓ **Automated Reporting** – Get instant PDF reports with full test breakdowns.
- ✓ **Cloud Portal Access** – View job history, site assets & share reports anytime.

Instant detailed test reports

Auto-generated test reports are instantly available after the job is completed.

Get a full test breakdown, digital signatures, and easy sharing methods.

Ensure client confidence with a seamless digital audit trail.

How XTR Pulse works with your kit

Step 1

Pair XTR Pulse with the DT Connect app (one-time).

Step 2

Perform tests with your current Solo or Testifire test tools.

Step 3

Tap Pass/Fail on XTR Pulse for Smoke • Heat • CO (and combos). Results are logged in DT Connect for quicker and easier reporting as well as for auditable records.
